SUMMARY

Computer Science Engineering student specializing in full-stack and backend development with hands-on experience building AI-powered applications, real-time systems, and scalable web platforms. Proficient in Next.js, TypeScript, PostgreSQL, Redis, and REST APIs, with a strong focus on software engineering, system design, and modern AI integration.

TECHNICAL SKILLS

- Languages: Python, JavaScript, TypeScript, HTML, CSS
 - Backend: Node.js, Express.js, Flask, Socket.IO, tRPC
 - Frontend: React.js, Next.js, Tailwind CSS, Vite
 - Databases: PostgreSQL, MongoDB, Redis, Supabase, Qdrant
 - AI/ML: Scikit-learn, RAG Pipelines, Vector Search, Gemini AI APIs
 - Frameworks & Tools: Prisma ORM, NextAuth.js, Docker, Git, Vercel, Render
 - CS Fundamentals: DSA, OOP, DBMS, Operating Systems, Computer Networks
-

PROJECTS

[StudySync](#) | [Live Demo](#) | Full-Stack AI Learning Platform

- Built an AI learning platform for document analysis, quiz generation, summaries, and conversational tutoring workflows.
- Implemented secure Google OAuth authentication and full-stack architecture using Next.js, Prisma, PostgreSQL, Redis, and NextAuth.js.
- Added RAG-based document retrieval, vector search, and Docker deployment with Render and Supabase.

[SyncTalk](#) | [Live Demo](#) | Real-Time Chat Application

- Developed a room-based real-time chat app with persistent messaging using React, Node.js, Express.js, Socket.IO, and MongoDB.
- Implemented responsive UI with room-based messaging, dark/light mode, and separate frontend/backend deployments.

[Car Price Prediction System](#) | [Live Demo](#) | Machine Learning Web App

- Built a web application to predict used-car resale values using Scikit-learn served through Flask.
- Performed data preprocessing, feature engineering, and model integration to improve prediction quality.

[Portfolio Github](#) | [Live Site](#) | Personal Developer Portfolio

- Designed and developed a modern portfolio website with responsive UI, dark mode, and project showcase sections.
 - Integrated resume download, GitHub/LinkedIn links, and deployed using GitHub Pages
-

EDUCATION

JNTUH College of Engineering Hyderabad

Bachelor of Technology (B.Tech) in Computer Science Engineering | 2024 – Present

Kendriya Vidyalaya CRPF

Senior Secondary Education (CBSE – MBPC) | 2022 – 2024

EXPERIENCE AND LEADERSHIP

- Explored practical applications of AI, machine learning, and intelligent systems through hands-on learning.
 - Research and build projects involving RAG pipelines, vector databases, scalable backend systems, and AI-powered applications.
 - National-level athlete in Kho-Kho and Badminton, demonstrating teamwork, discipline, and consistency.
-

CERTIFICATIONS

- Google — AI Essentials, Prompting Essentials, AI Professional, Data Analysis with Python, IoT & Cybersecurity
 - IBM SkillsBuild — Generative AI, RAG & Agentic AI, AI for Software Development
 - Microsoft — Power BI Data Analytics
-

INTERESTS

- Full-stack development, AI-powered applications, backend engineering, and hackathons.
- Building real-world projects, exploring modern technologies, and maintaining active GitHub development activity.
- Continuous learning, technical workshops, and problem-solving through hands-on development.
